## SUMMARY

Software engineer with a passion for team-oriented solutions. Successful history for designing and implementing creative web applications. A desire to expand my skill set in tandem with a strong team and cutting edge company.

### Recent Projects:

- **West Coast Springs -** Fullstack MERN app for users to share and explore their hot springs vacations. Interactive map made with Leaflet library. Self made Database. User Authentication. https://westcoasthotsprings.vercel.app/
- **Scare-Factor -** A modern landing page for a recent escape room business. Sleek UX/UI design, fully responsive on all devices. Creative CSS mixed with Javascript. https://scare-factor.netlify.app/
- **Remove Tile Guessing Game -** React based web application. A twist on the Wordle genre. Users remove tiles from a board to guess the underlying image. https://tile-guess-pokemon.netlify.app/

### Other Projects:

Business landing page (oakberry-fruit-bowls.netlify.app/), Educational/Interactive map using NOAA database (interactive-data-eruption-map.netlify.app/)
Open Source Contributor - https://github.com/4paradigm/OpenMLDB

## PROFESSIONAL EXPERIENCE

### Software Engineer at 100 Devs Agency | Los Angeles, CA

November 2021 - Present

- Collaborated with a team of developers to build and design responsive web applications.
- Accurately determining and representing deliverables and timelines through clear communication and contractual agreements.
- Website development using full stack technologies, tailored to client needs and allowing for ongoing management by the customer.

### RBT/Certified ABA Specialist at PRAISE | San Luis, CA

January 2019 – February 2021

Provided highly technical care for young adults with autism. Worked with a small team to consistently improve and adapt teaching methods as needed. Conducted data collection and assessment based on the PRAISE model in a virtual environment.

### Marketplace Manager at Skylighter.com|San Luis, CA

January 2017 -- December 2018

Maintained ecommerce marketplace utilizing React framework. Established and consulted relations with customers via live service. Worked on a team that utilized SCRUM methodologies.
